Irregular stacatto with distancing and approaching of the trumpet or the wa-wa

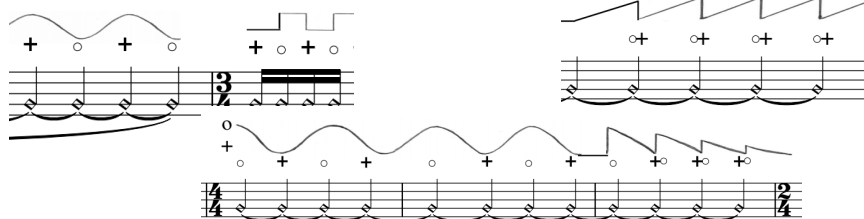

Plunger, wa-wa and hand

o = open

+ = closed

Damper modulation envelopes

Regular or rhythmically measured:

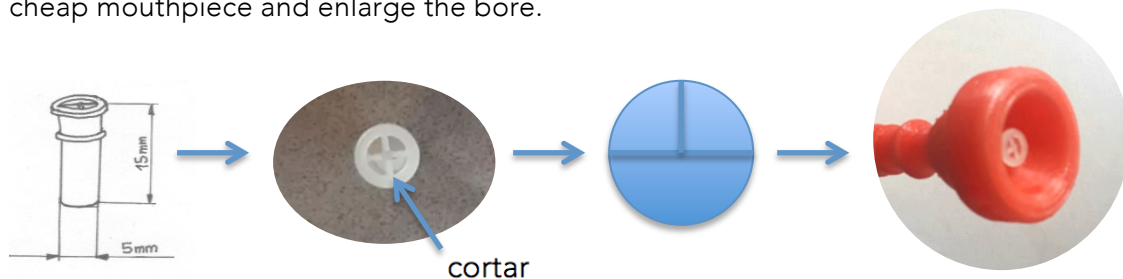

Irregular (senza misura)

How to prepare the squeaker in the mouthpiece

Prepare squeaker (a small device used inside children's toys that makes a short, high sound when it is pressed, small: 5 x 15 mm) by cutting a wall to remove resistance and promote air flow. Use a large bore mouthpiece of 5mm diameter. You can use a cheap mouthpiece and enlarge the bore.

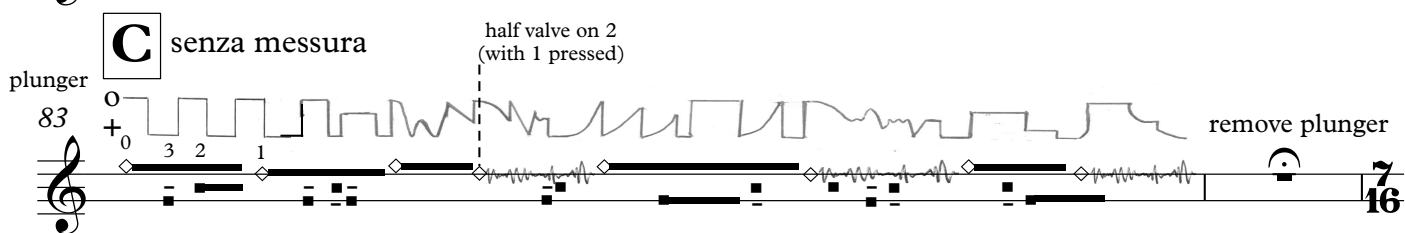

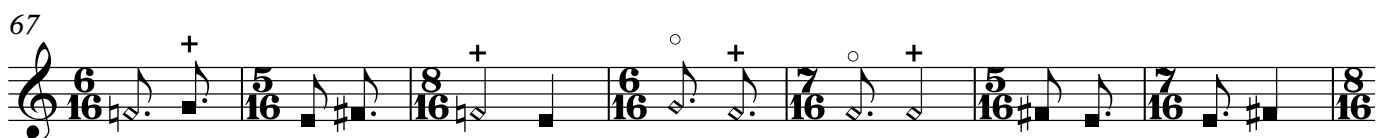

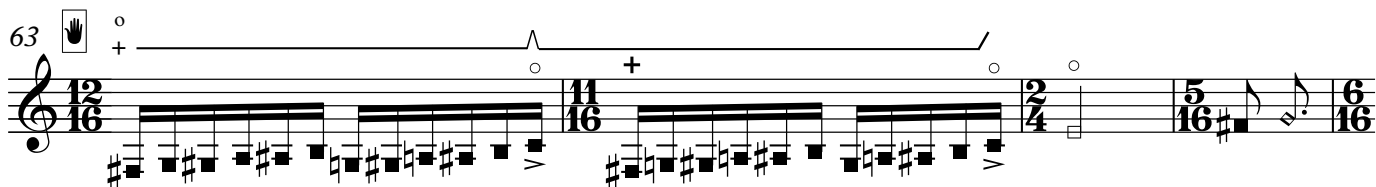

General Notes

- Second and third slides should be removed throughout the whole piece.
- The notes on the staff only refer to the fingering, not the pitch.
- The piece can be amplified if necessary.
